Sunrise Electronics was established in 1991 with a team of 40 workers, as a Chinese saying quotes "Nothing good comes easy", back at the very beginning, it was very hard for its founders to develop the factory. The whole team has been working day and night for one thing and one thing only----Get 50 clients in two years. Well, it took 5 years.

Sunrise Electronics had chosen a tough way to develop itself. It rejected to offering cheap product with bad quality, it was a fast way to develop a new company back at that time, but it said NO to that. What it wanted is when everybody talks about headphones factory or Sunrise Electronics, everybody will throw a Thumbs-up. There fore, "quality is its culture" becomes its slogan ever since.

Now, Sunrise Electronics managed 270 workers and a 20,000 square meter self-built factory. As an OEM/ODM manufacturer, it knows the key to stay alive is by offering a reasonable price, investing in R&D, efficient service and quality control. And it meant it. Every product from Sunrise Electronics is compatible with EU standard, because it focuses on European and North American market for over 20 years.

*Revolution in Sound  
Quality is our Culture*
